

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

﴿يَا أَيُّهَا الَّذِينَ آمَنُوا خُذُوا حِذْرَكُمْ﴾

**“O you who have believed, take your precaution and [either] go forth in companies or go forth all together” [An-Nisa: 71]**

(Translated)

The President of the National Coalition Khaled Khoja said in his interview with the *Middle East Newspaper* on 02/05/2015 CE: "The veto that was imposed on the Free Syrian Army to receive anti-aircraft missiles will end," revealing US efforts "to find a mechanism for the establishment of safe areas", attributing the reason for the political and military improvement is the result of closer links between Saudi Arabia, Turkey, Qatar, Jordan, and of course with the monitoring and follow-up of America. He pointed out that the Assad regime could fall in an uncalculated moment.

The recent victories achieved by some factions over the forces of Bashar the criminal must be placed in the context of the Geneva 3 Conference, which was announced to take place on 04/05/2015 CE. This conference, which both the regime and the opposition with all its differing parties believe that it will take the decisions of the Geneva I Conference as the basis of the solution that will be discuss in it, this conference aims to achieve progress to fulfill those decisions. The victories achieved were to create a state of balance of power between the regime and the opposition, to form the justification for the coalition in front of the people, to sit at the negotiating table and to show that it is negotiating from a position of strength, and if the people accept this, it means that the train of the American solution has begun to move, no doubt that there will be many stops for the train that would be called: Geneva (3) and Geneva (4) and Geneva (5)... ; so that in each stop a part of this solution will be reached, and so on until it reaches the last stop, in which the American solution would be ready, by finding the alternative agent ruler to Bashar, so that he will be the worst successor of the worst predecessor.

These victories Khoja attributes to Washington lifting of the veto that prevents countries from supplying militant factions with "anti-aircraft missiles" and he reveals that ", Turkey, Qatar, Jordan and Saudi Arabia" are following the US commands. Unfortunately, instead of Khoja attacking America for causing Muslims tragedies in Syria because it has imposed upon the international community to prevent supplying them with weapons, and keeping silent over Russia and Iran supplying Bashar the butcher with weapons, and instead of attacking the Muslim rulers for surrendering to the American will; we see him proud of this studied permission to provide fighters with quality weapons and this temporary lifting of the veto. Khoja is naive for believing the American position and considered it a change, and this is when he went on to say, "The Assad regime could fall in an uncalculated moment," unless he thinks he is the alternative.

As for the talk about finding safe areas to allow the coalition that was created by America from entering Muslim areas and manage them and to contain this blessed revolution, and to prepare the internal fighting on the ground. And the talk about the approaching of the decisive storm from the land of Ash- Sham, and the talk about the blessing of America to it, is a clear signal of its intention to use an effective international forces that includes Arab forces to impose its solution on the ground, and they may be added to the international-led coalition that it is leading in Syria and Iraq to fight what it calls terrorism.

O Muslims stationed in Syria of Ash-Sham, the abode of Islam: There is no doubt that the recent victories achieved by the blessed revolution of Ash-Sham showed the extent of

the criminal Bashar system's inability to stand in its way, and showed that without the American support for the butcher Bashar he would have been buried by now next to his brother Gaddafi. What is permitted from the victories and what takes place of conferences; Geneva, 3, 4...only falls within the US interest. What is intended to be achieved in Geneva 3 is the creation of an atmosphere to convert militant factions' guns away from its objective, which is fighting the regime, to the strife of factional fighting among themselves on the pretext that there are moderate factions and other extremist terrorist; so the focus is on taking the loyalty of factions in this period. The United States is fully aware that the only obstacle in front of its project in Syria is the Khilafah project; it is aiming to strike it with Muslims themselves under the pretext of fighting terrorism.

O Muslims stationed in the land of Ash- Sham, the abode of Islam: the leader does not deceive his people. As we follow all the moves by the United States through its agents in the region, we present you with the following facts:

- The United States is working to keep control of the land of Ash-Sham by imposing its project of the civil democratic state that separates religion from life; and fights every attempt of liberation from its hegemony by establishing the rightly guided Khilafah on the method of Prophethood and that is under the name of fighting terrorism.

- The American project will be imposed on two fronts; the first is by finding a political entity (a new agent) for it to negotiate with its old agent the criminal Bashar, and thus it would have secured the transfer of power to and from it. The second front shall be through the creation of a military force that is able to be in control on the ground for the imposition of the civil state project by force, and to prevent any serious work for the establishment of the Khilafah under the pretext of fighting against terrorism and extremism.

- All the actions that America took and will take from the protection of the criminal Bashar in the beginning, and preventing quality weapons from Muslims, and putting the requirement to protect the military and security institutions, and the attempt to impose a safe area, and giving the green light to a decisive storm in the land of the Ash-Sham, and the creation of a national army, and the establishment of the coalition and attempt to introduce it to the liberated areas, and attempt to create a negotiating body, and the Geneva conferences... all of this military and political actions fall under in these two fronts.

Hizb ut Tahrir in Syria warns the revolutionaries who came out sincerely, to be patient and steadfast and hold onto the rope of Allah (swt). You did not come out for a worldly matter exclusively, but you came out to make the word of Allah the highest, you sacrificed your blood in the way of Allah, and you abandoned the world and its pleasures, and you declared from the onset that this revolution is for Allah, and that its leader is Muhammad the Messenger of Allah (saw), and you faced the bigotry of the West and its agents, so proceed with the blessing of Allah and join your hands with the hands of the sincere of your brothers and you will win in both worlds the first and the Hereafter and that is easy to Allah (swt). Allah (swt) says:

﴿إِنَّ اللَّهَ بِأَمْرِهِ قَدْ جَعَلَ اللَّهُ لِكُلِّ شَيْءٍ قَدْرًا﴾

**“Indeed, Allah will accomplish His purpose. Allah has already set for everything a [decreed] extent” [At-Talaq: 3]**

**Oh Allah have we not conveyed, Oh Allah be our witness.**
