

Press Release

## Indeed... We Refuse to Implicate the Country and the Army with NATO

(Translated)

There was news about a request from Tunisia or requesting it to become a major non-NATO ally... And because this is a very grave and serious matter and it will, Allah forbid, put Tunisia in a terrifying military and political context that makes the country infiltrated, exploited and will not have the decision. We reiterate our absolute rejection for this treacherous work and call everyone to rally around the Ummah's project of liberation, wherein Tunisia attains the lead and the precedence role. And we hold the authority, the government and the presidency the full responsibility of what will result from that devastation and destruction of the country and the people and what it will bring of tension and clash with Algeria - the country of a million martyrs.

We will struggle politically with all kinds of legitimate struggle, no matter what it costs us and no matter how severe the sacrifices may be so as Tunisia does not become just an international calculation....
