## America Solely Arranges for a Terrifying Regional Situation in Tunisia

(Translated)

Here is Tunisia waking to a catastrophe and a new type of terrorism prepared by the politicians behind the back of the people and the Ummah.

Here is Tunisia after these suspicious military and political agreements with the United States - God forbid – meant to serve as Kuwait for Iraq and the consequent tragedy known to all, and through this way Tunisia enters in a regional game, rather a terrifying destructive international game.

To achieve this, Tunisia was given the privilege to be the unique ally within NATO and what that entails from is the establishment of military bases or spying platforms and intelligence and military and logistical facilities on the land of resistance, Tunisia. And thereupon began an assemblage of politicians accused of insulting Algeria by claiming that the new position of Tunisia within NATO is not its business, this is why the Zionist Bernard Levy came to Tunisia at the invitation of suspicious parties touring about and secured his network of contacts. And Nicolas Sarkozy, the failure and the deceitful, is received shamelessly as Heads of State and heroes and furthermore is even allowed to make statements against Algeria and Libya of blatant disregard, contempt and provocation. As a reminder, Sarkozy not long ago described the revolutionary migrants in France as insects and villains, and it was he who supported the suppressive acts by Ben Ali to the last moment, to the last drop of blood, and he is a dear friend of the system of corruption and corrupt people in the Bin Ali regime even outside the formal framework. To this end, and before that, the drama of operations was prepared for the Americans to gain a tight grip and justify their overt intervention, through the terrorist operations of an international scale, even children found the official narrative unbelievable. Conditions were prepared to crack down on serious politicians and the Islamic movement in general and on many platforms and mosques and many from the media outlets.

Thus this confirms today what Hizb ut Tahrir said months ago, that Tunisia is in a state of captivity and that Algeria is the future strategic booty of the United States of America. Today it has become a daily news report of and a scandal of an international scale that stuns everyone, and it is the revolution that is the responsibility of Tunisia and its people, that all waits for its results! Everyone is holding their breath fearing for the fate of Tunisia and Algeria and the region as a whole.

We call the sincere and honest to severely account, accounting collectively and individually whoever caused this shameful situation, and we call them to stand in the face of all the conspirators internally and externally.
