

Press Release

The Interior Minister of the Crusader France in Tunisia! This Enemy is a Burglar, so they are not welcome (Translated)

France's Interior Minister Gerald Darmanin announced that he will come to Tunisia and then Algeria at the end of this week, to discuss the issue of combating terrorism (as he claims) and expelling foreign extremists (meaning Tunisians and Algerians), and he said that he came to speak with the Intelligence Services to obtain more information.

We in Hizb ut Tahrir / Wilayah of Tunisia reject this visit and condemn the subservient treatment of the Tunisian authority with France, for the following reasons:

1. France attacked Tunisia, its people and all Muslims, on the day its president insulted our glorious Islam, calling Islam and its followers as terrorists. In addition, it is a colonial state that is desirous in our country, boasting its colonial history for which it set the law glorifying colonialism, glorifying its crimes in Tunisia and Algeria. So is it permissible to consider it a friend?!
2. France's crimes are too great to be erased by sweet words that are poisoned, the French army's contribution to the slaughter of Muslims in Central Africa a few years ago is well known.
3. France employs and fabricates terrorism, especially these days, and its intelligence has created many terrorist incidents to restrict Muslims in France, and to divert the attention of the French public opinion from its successive crises. The welcoming of the French ministers by the regime of Tunisia is a vindication of France and an erasure of its crimes, entrenching the lie of terrorism and accepting France's accusation of Islam and Muslims with terrorism, and this is a disgrace that real men do not accept.
4. This French interior minister, who will be welcomed by the authority, is coming to take information from our Intelligence Services, and the authority will give him the information he wants. This is a harnessing of Tunisia's institutions and apparatuses for the benefit of the enemy! This is considered high treason in all countries.

To our People in Tunisia in general, and the People of Power specifically:

This is how our enemies are welcomed and our security services are harnessed for their service, as if Tunisia and its institutions are part of France! For how long will you keep silent over a regime that is humiliated before the enemies, whose rulers accept disgrace, and rather walk the path of high treason?! Is it not necessary to uproot them to depose colonialism from our country? The time has come for us to be truly liberated and to establish a true state led by statesmen who are dignified by their Deen, merciful toward their people, and who are firm toward their enemies.

In conclusion, we say to the French minister:

You would not have had the audacity to attack us and our glorious Islam if the Khilafah (Caliphate) state existed, but you found quasi-rulers who have no power or glory, so you revelled, became audacious and exceeded your limits. Do not be deceived by the dwarves of politics and the quasi-rulers who sold themselves, their religion and their Ummah, and bowed to your ideals, for they are an anomaly in our history that we will soon fold, by the will of Allah. And know that the Ummah of Islam no longer gives them any importance and that it has risen and will soon trample them with shoes, and it will evacuate you in real terms with the imminent establishment of the Khilafah state, by the will of Allah. Our Ummah today is closer to its goal and looks forward to that day with its heart and its limbs, and with sharp eyes, loud voices and hearts believing in the Subdued One, it chants: "**Our leader forever, is our master Muhammad.**"

Today and here, we have an address of warning to you that you may know your value and abide by your size in front of the glorious civilization of Islam. As for tomorrow, the day the Caliphate is established, the response will be by what you see, not what you hear. It is by turns that days are apportioned, and this is the time of Islam if only you know.
